Learn about yourself and grow your **leadership skills** by practicing **creative problem-solving techniques**

Assists students in creating creative problem-solving strategies for success in their academic lives. Students explore personal and academic strengths and barriers that impact success, identify and utilize university resources available to support success at ASU, acquire and enhance academic skills necessary for success in the university, and discover ways to stay on course to meet academic goals.

**You will learn:**

- To apply the creative problem-solving process to various personal, academic, and professional problems
- Build your skills within the 10 mindsets and attributes necessary for strong creative problem-solving practice
- Select a problem and complete a semester project to answer the question, “How might we solve this problem?”
- Evaluate proposed solutions through the prototyping and iteration cycle

Increase your **mental flexibility** and **critical reasoning** by analyzing current events and issues

Designed to improve critical thinking skills through active discussions, debates, and writing with an emphasis on argument analysis and information literacy. Students develop strategies to enhance critical thinking utilizing a range of sources. This class teaches interdisciplinary strategies that can be applied to assist with interpreting, analyzing, critically evaluating, and writing about a variety of ideas. This 3-credit course fulfills the "L" literacy requirement.

**You will learn:**
- Research articles related to topics of your choosing and analyze existing arguments
- Construct your own arguments in writing and in debate
- Practice an open-minded and curious approach to new information
- Apply problem-solving processes to their work throughout the course

Emotional Intelligence

Leadership and Success

Explore the concept of Emotional Intelligence (EQ) and the influence it has on leadership, success and relationships. Is IQ more important than EQ? This course will focus on the multiple theories and application of emotional intelligence in and around our lives. It will be a discussion and application-based course focused on the development of self-awareness and self-management of emotions in our lives, as well as how this all influences our success in multiple areas of our lives.

You will learn:

Learn why EQ and IQ are equally important to your success  
Increase your self-awareness and self-management of emotions  
Develop better relationships with others  
Become a more well-rounded leader

Life by design

An invaluable part of your learner journey

College offers you the opportunity to explore interests and find career paths that align to your genuine interests and personal goals. But, where do you start on this journey of self-discovery? This course introduces you to the design thinking process – a strategy used by the world’s top designers to launch products and services – and applies that process to your individualized career and life plans. You'll explore how the college experience – through majors, classes, experiential learning, networking and other student services – can support your journey. And, you’ll develop a growth mindset that helps you experiment, live creatively and develop self-confidence.

You will learn:

- Design thinking
- Building a supportive network
- Tapping into flow states
- Building mind maps, articulating purpose

Practice your presentation prowess with poise and power!

This course is designed to assist students in focusing on an academic approach to a student-chosen topic of interest. The course is taught from an “organic perspective” that is student/content centered. To enable students and the instructor to have frequent and meaningful interactions with each other and the group, class size is limited.

You will learn:

- College level research and academic writing
- Presentation skills
- Comprehending information
