

Our Mission

Who took the survey?

The people that participated in our survey contains a wide variety of the population. This includes students, friends and families of ASU Sun Devils. By receiving data from all these different sources we are able to get insight into how everyone personally feels about mental health. With over 60 participants in our survey we were given a solid representation of how the population feels.

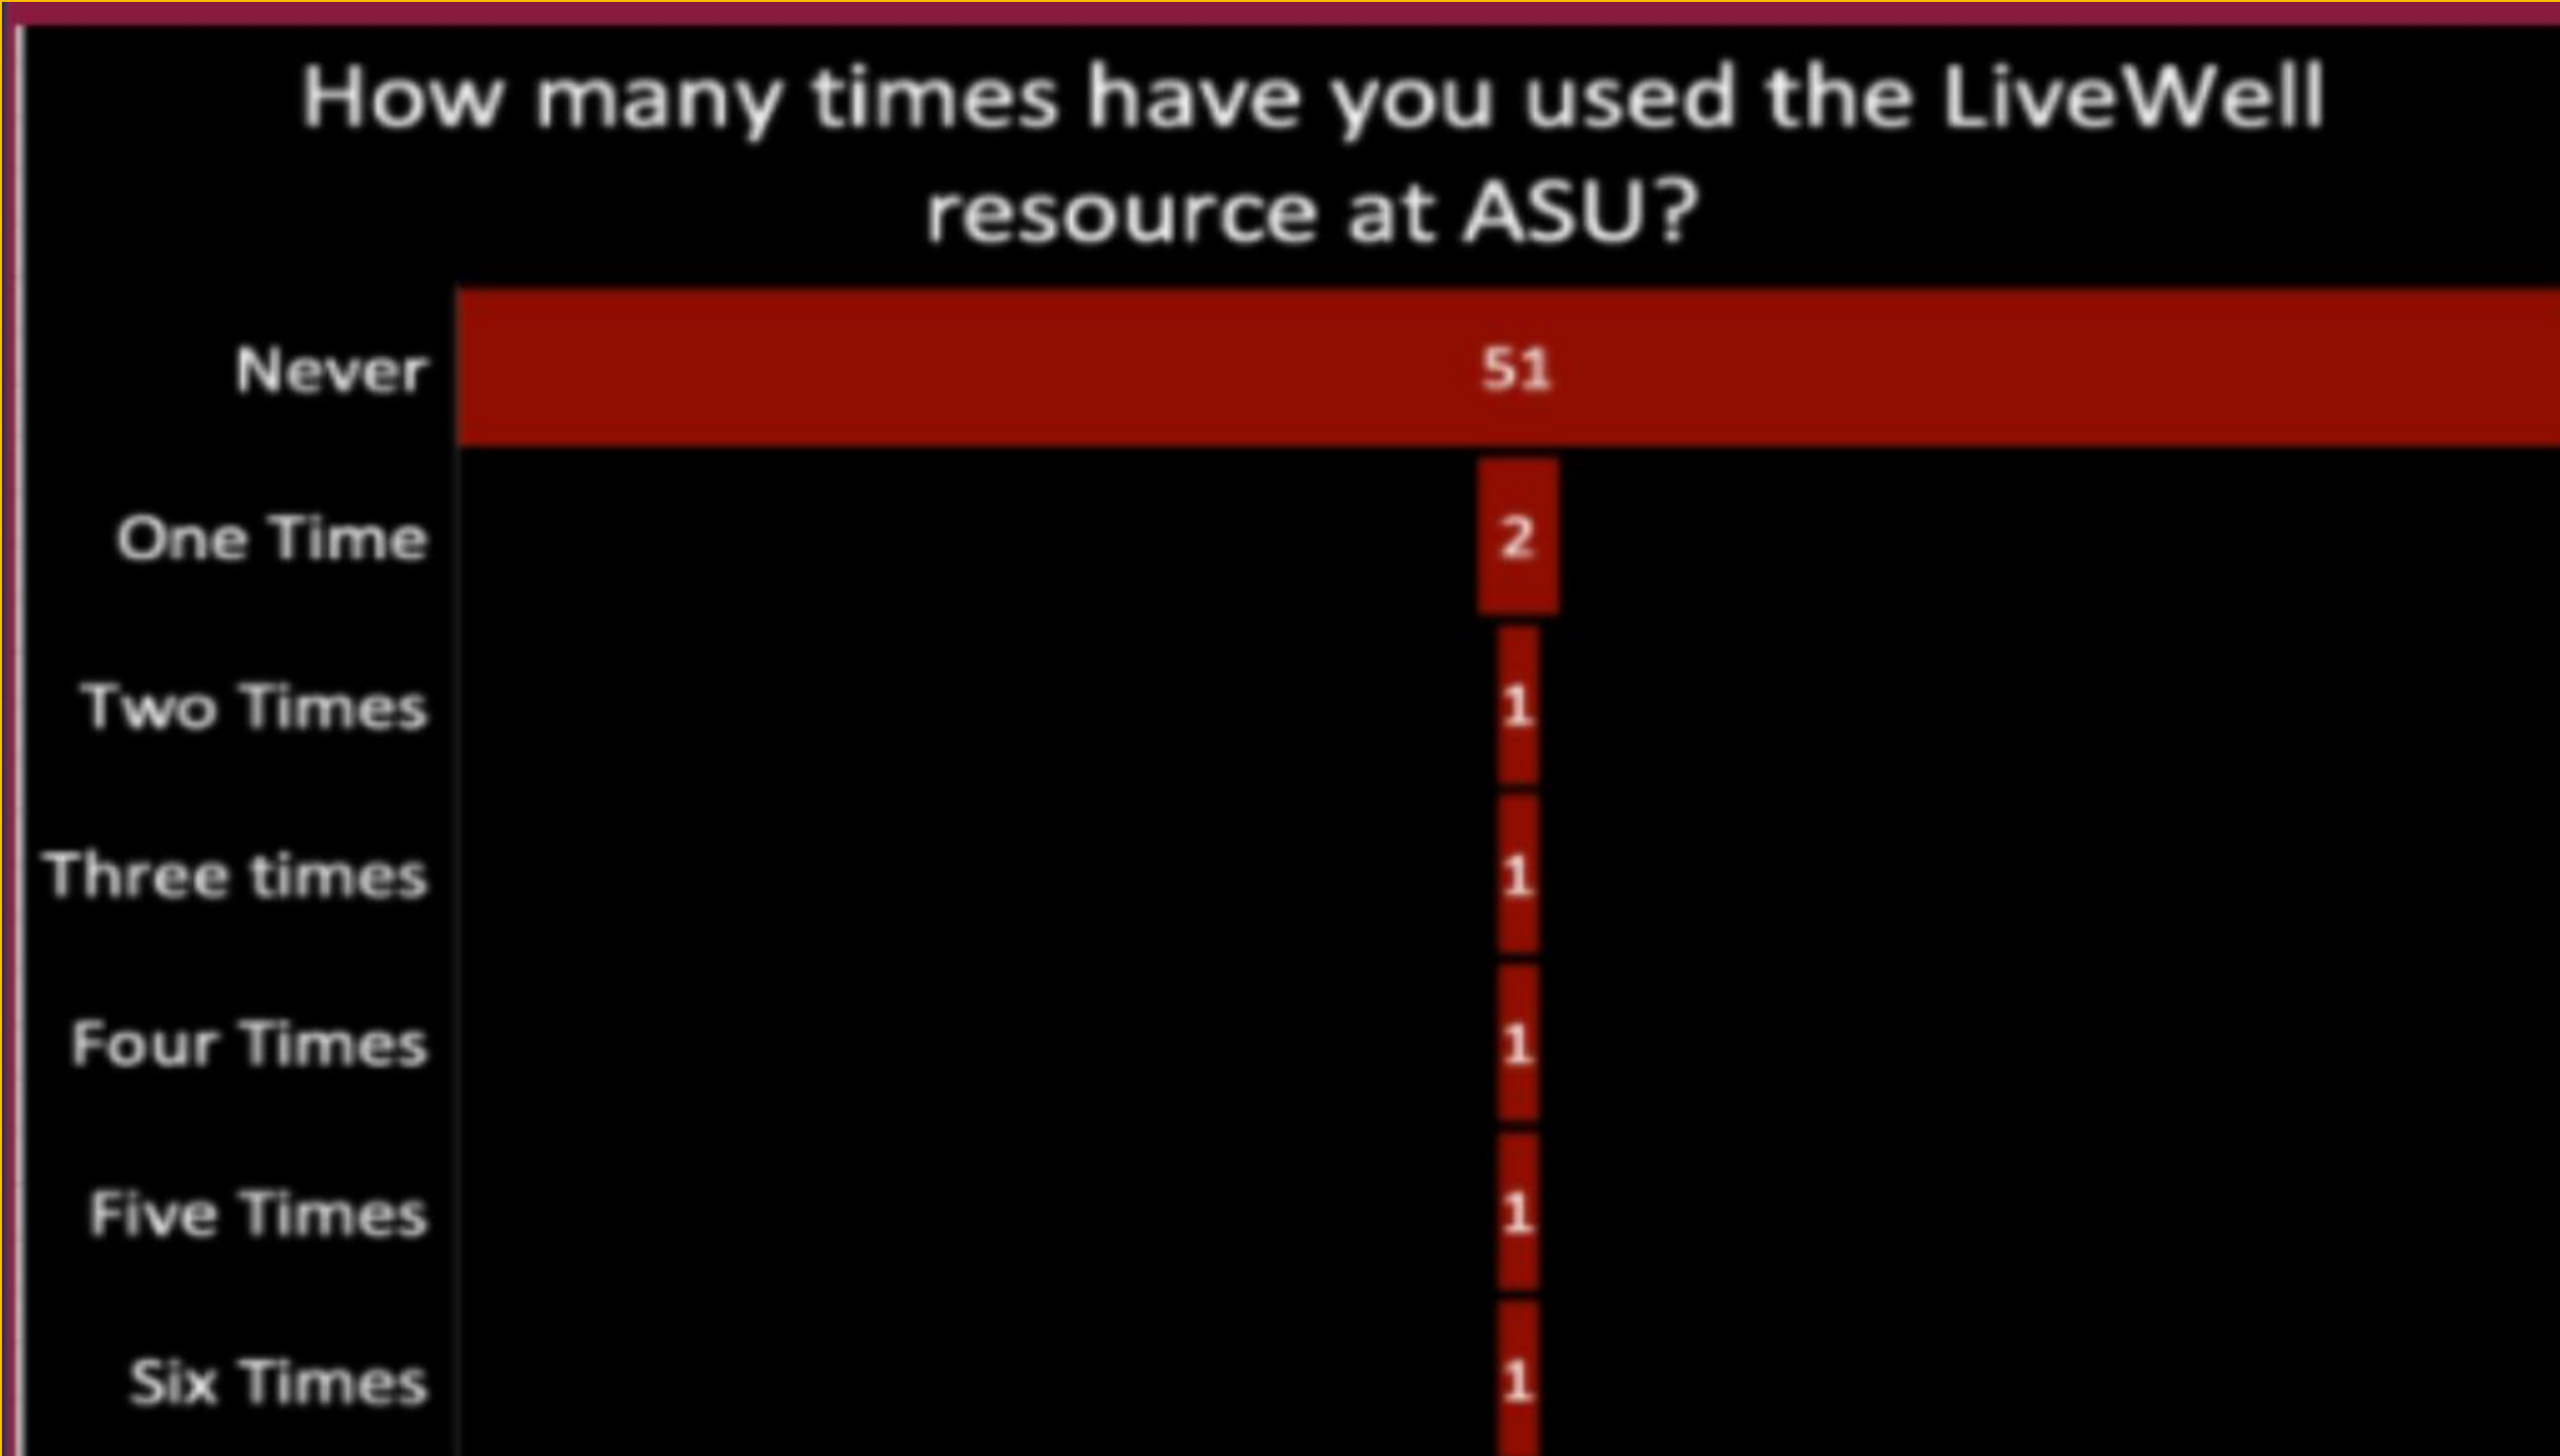

We want to raise awareness on the importance of mental health and the resources available to students at ASU.

What is the Devil Health App?

We are in the developing stages of creating an application where it offers multiple ways to improve or to hopefully maintain a solid state pertaining to their mental wellness. Quotes, activities, hobbies, and counseling services at ASU will be offered with many other resources students can utilize. By doing this it will allow students to find out new ways to stay mentally fit while at the same time not being a burden to the student.

In our survey 79.2% of participants have never used the Live Well resource at ASU.
