Learn about yourself and grow your leadership skills by practicing creative problem-solving techniques

You will learn:

- To apply the creative problem-solving process to various personal, academic, and professional problems
- Build your skills within the 10 mindsets and attributes necessary for strong creative problem-solving practice
- Select a problem and complete a semester project to answer the question, “How might we solve this problem?”
- Evaluate proposed solutions through the prototyping and iteration cycle

Assists students in creating creative problem-solving strategies for success in their academic lives. Students explore personal and academic strengths and barriers that impact success, identify and utilize university resources available to support success at ASU, acquire and enhance academic skills necessary for success in the university, and discover ways to stay on course to meet academic goals.

Learn about yourself, maximize your strengths, improve your weaknesses, and strategize for success in college and in life

You will learn:

- Success strategies, procrastination and diagnosing barriers
- Choice/self-management and responsibility
- Growth and fixed mindset
- Identifying patterns and embracing change

Explores how students’ strengths and barriers influence success (i.e., how mindset, perception and beliefs influence behavior) and discovers methods for staying focused and meeting academic, personal and professional goals. Students acquire and enhance emotional intelligence skills for success in and out of the classroom.

Being aware of what is happening right now will encourage mindfulness in all that you do.

You will learn:

- Display an understanding of yourself
- Have a clear perception of the self in relationship to others, local community, and the larger world
- Begin to apply the philosophy and practice of mindfulness to daily life

UNI 240: Mastering Mindsets provides students with the opportunity to explore mindfulness and the impact it has on their success as a student, an individual, and in the future. Therefore, students will research topics of interest with the subjects of psychology, emotional regulation and mindfulness in order to deepen their understanding of how the brain and the mind influence beliefs, choices, behaviors and learning.

UNI 294 Course
Emotional Intelligence:
Leadership and Success

You will learn:

- Learn why EQ and IQ are equally important to your success
- Increase your self-awareness and self-management of emotions
- Develop better relationships with others
- Become a more well-rounded leader

Explore the concept of Emotional Intelligence (EQ) and the influence it has on leadership, success and relationships. Is IQ more important than EQ? This course will focus on the multiple theories and application of emotional intelligence in and around our lives. It will be a discussion and application-based course focused on the development of self-awareness and self-management of emotions in our lives, as well as how this all influences our success in multiple areas of our lives.

Practice your presentation prowess with poise and power!

You will learn:

- College level research and academic writing
- Presentation skills
- Comprehending information

This course is designed to assist students in focusing on an academic approach to a student-chosen topic of interest. The course is taught from an “organic perspective” that is student/content centered. To enable students and the instructor to have frequent and meaningful interactions with each other and the group, class size is limited.
