Lines at the dining halls have long wait times, often in the middle of students’ schedules, leading to compromise just for a meal. The MU is even worse due to the lines, it seems one can’t go to there if they are in a time crunch. With our solutions, sacrifices won’t have to be made.

67% of all dissatisfied students surveyed would use an app to give feedback.

ASU Dining should create an app where students can:
• Provide feedback
• See upcoming menus
• Order Online
• Integrate with the ASU app

The creation and integration of this app would decrease the average wait time for students. Allowing students to preorder their meals and skip the line will incentivize more students to follow.
