

ASU Community Gardens

Our Mission

We hope to help create a sustainable community that will help students be more involved in ASU. As well as encourage students to create a healthier lifestyle throughout their college experience.

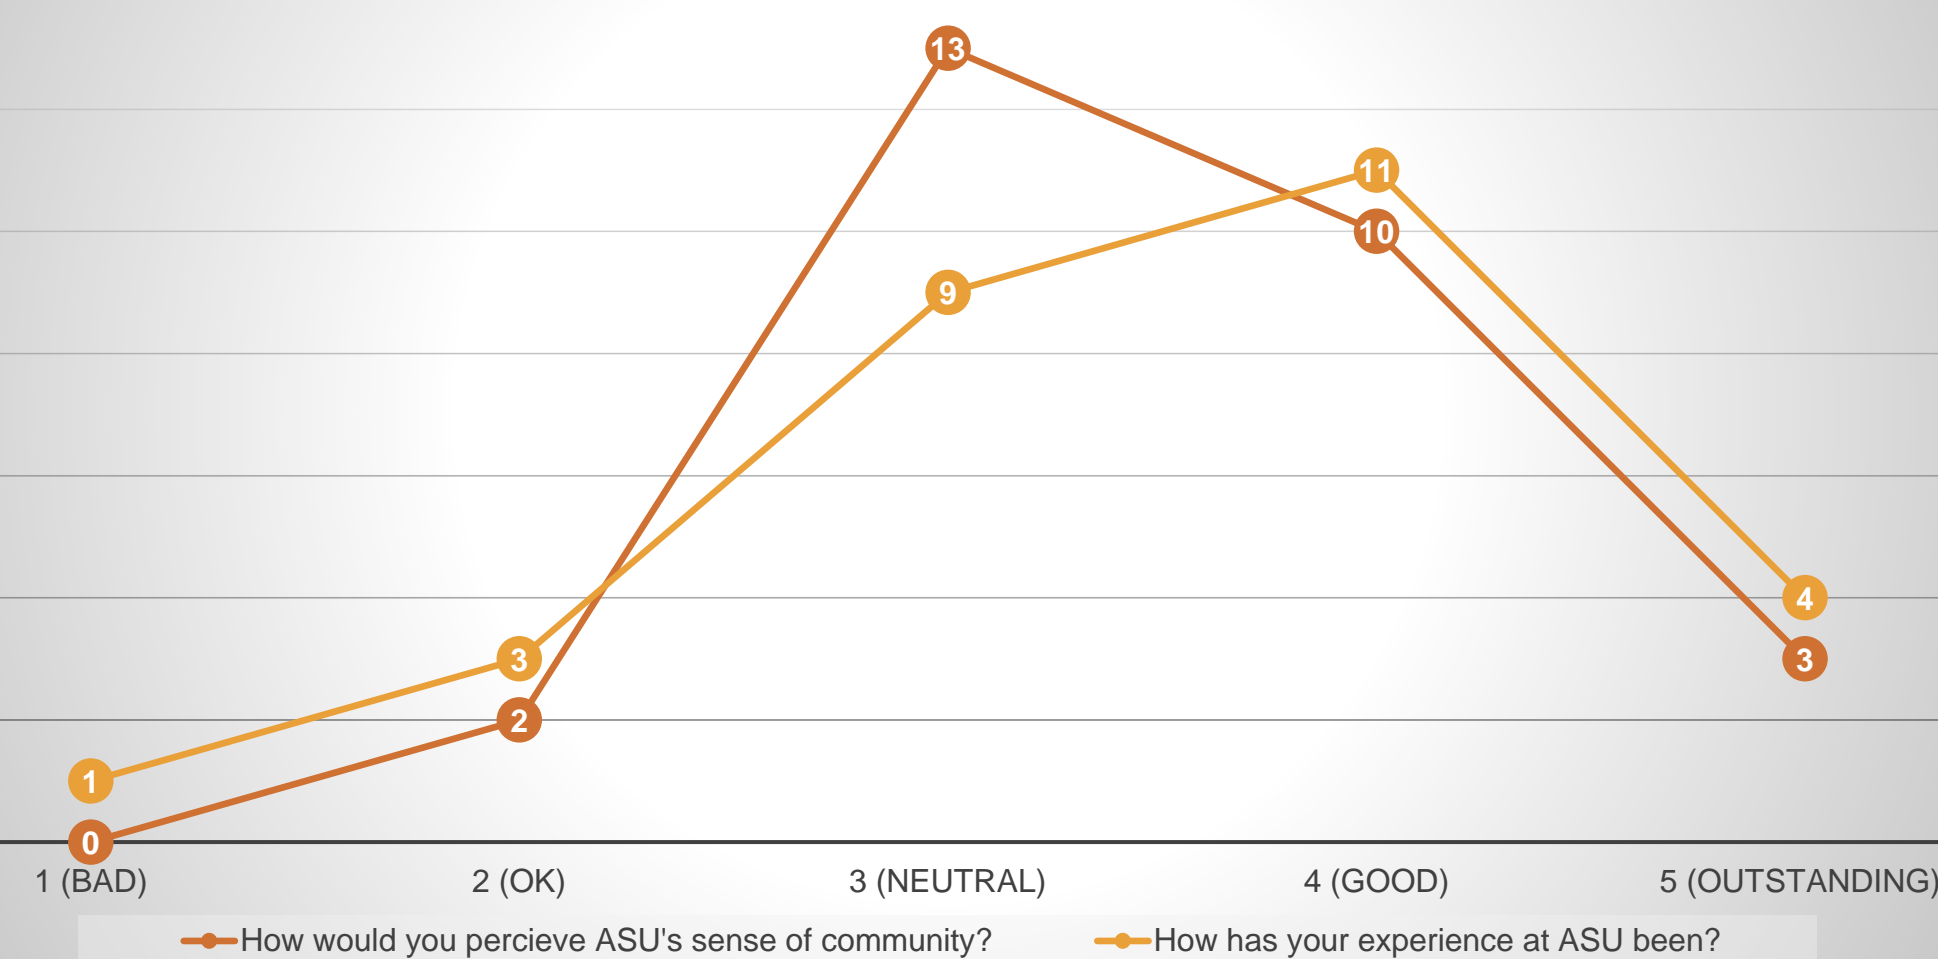

Benefits

- It helps you eat more fresh fruits and vegetables.
- You decide what kinds of fertilizers and pesticides come in contact with your food.
- It lets you control when to harvest your food.

Community Gardens can help create healthier alternatives for students.

Sense of Community at ASU

There would have to be a solid group of students that are responsible enough to be able to handle such a task.

Community Gardens teach healthier eating habits.

- Increases work ability
- Stress relief
- Combat food insecurities
- More in tune with student body

Healthy Lifestyle Change
