The goal of this project is to bring attention to the Safety Escort System offered at ASU. We would like to add additional funding to this for expansion and to also make it offered for longer hours to reduce crime and increase safety on campus.
Cohort #

ASU 121 Safety Escort

**Problem**
- Students feel unsafe on campus at night
- Crimes such as robberies and rape are prevalent on campus especially late at night
- Most students on campus do not have a car or have to park far away from the dorms
- Closing at 2AM is not enough time to make sure people make it home
- Without a reliable means of transportation around campus it leads to driving intoxicated

**Solution**
- Expansion of hours to make sure students know they can rely on ASU
-- Campus transportation to reduce driving impaired and increase safety
- Emphasize on timely manner as if the transportation takes too long people will call it off or become unsafe during wait period
- Better outreach to make sure students understand boundaries of campus and to take advantage of this resource
