Our Mission

To improve the safety escort service and encourage more students to utilize it.

Safety Escort Service at ASU:

The Livesafe app is an app created to allow students/teachers/faculty etc. to report any incidents that happen around or close to campus to any other student that has the app.

What is the Live Safe app? Half of students don’t know

The Pie chart shows different reasons why they don’t use the safety escort service. The green (40.5%) majority claim they don’t know about it while the purple (32.9%) states those that don’t use the service because they have their own car.

How did we get people to take the survey?

As students we posted our survey on social media and even tried to walk around and get some more responses. About 150 students participated in our survey.
