

Mental Health Kiosk

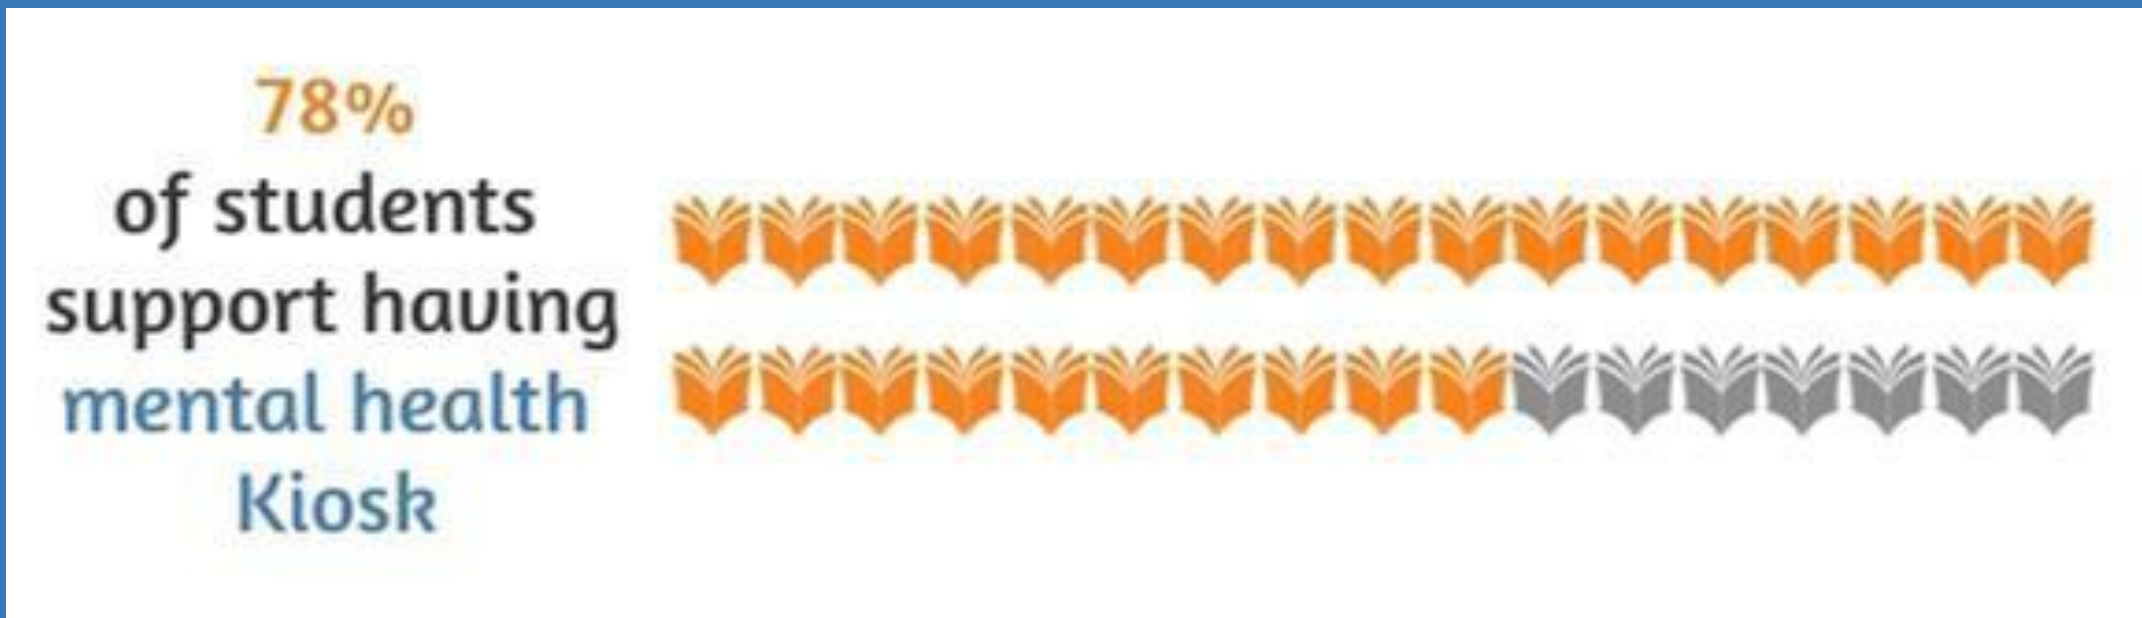

Our idea is to create kiosk that students can use to reach multiple ASU resources and find the right information anonymously.

The kiosk will be used to refer students to the right resources without diagnosing students or bringing attention to the person using the kiosk.

Other schools that installed kiosk costed about \$5000 per kiosk

Why?

Possible Locations

Hayden Library

Noble Library

Sun Devil Fitness Center

Benefits to ASU and Students

ASU will save money by using less resources and making it easier for students to understand the resources available.

Students can also easily find the resources they may need and without being diagnosed
