Many students don't understand how much parking cost is because it's not included in tuition.

There is a limited space of housing rooms and parking spots for students who live on campus.

ASU's Hidden Cost/Space

At ASU, students should be provided with more space in parking lots because many times they are not able to find parking spots.

Why do professors pay more for parking if they are hired to work there. There are less parking spaces available to them.

ASU should create more fundraisers or fund accounts to expand lot sizes and more housing available for out of state students who don't have anywhere else to stay.
