

# Devil's Defense

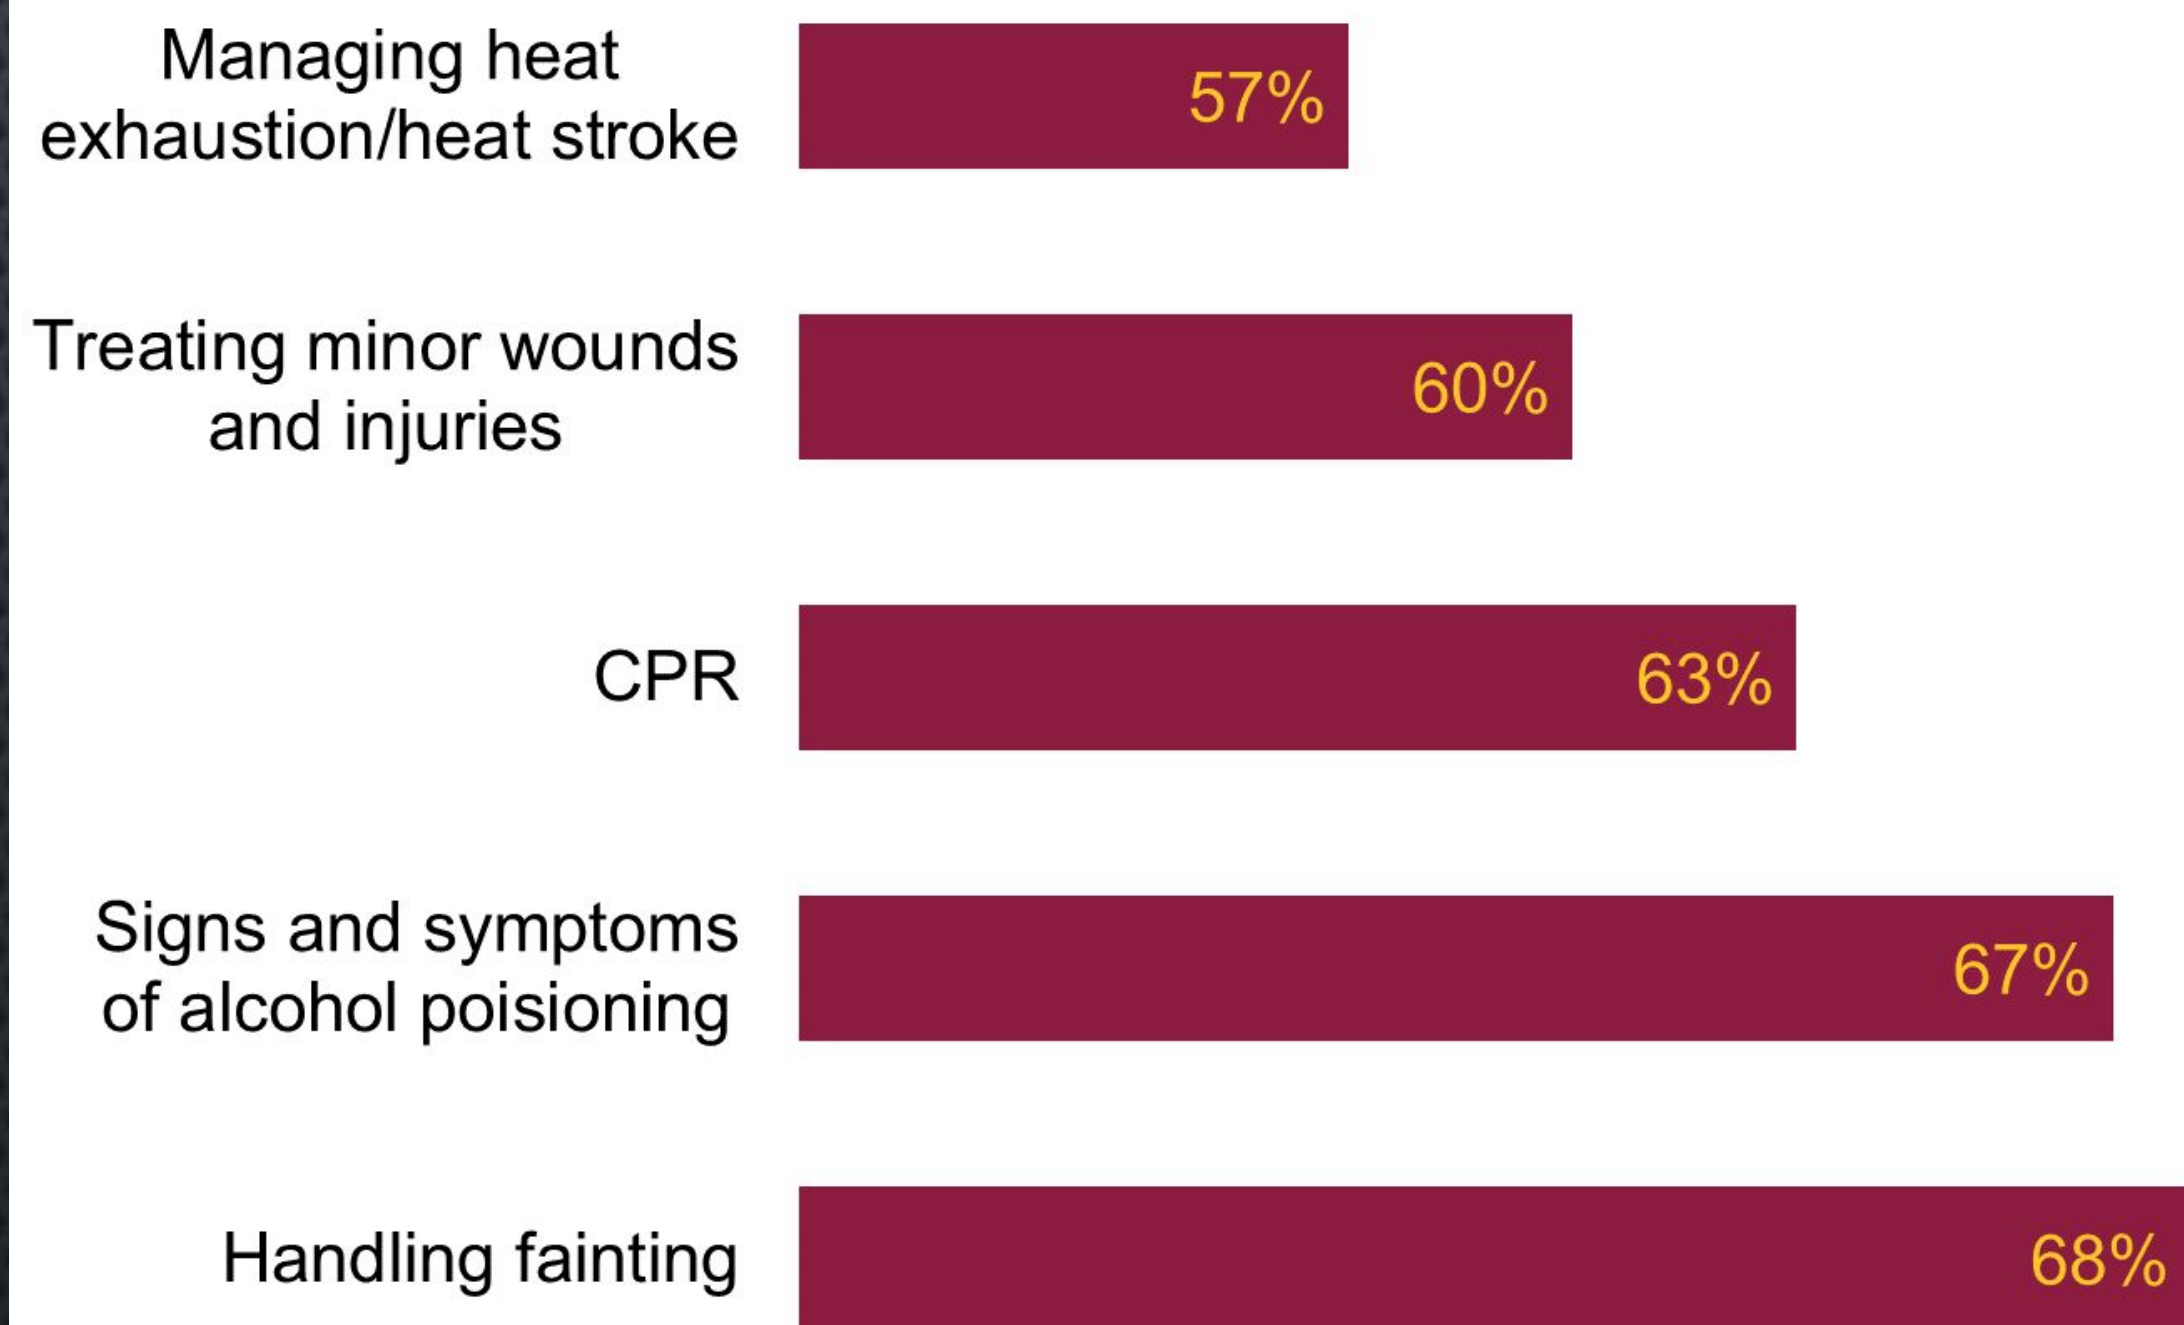

Over **72%** of students surveyed feel there is **not enough information** provided to first year students about **self-defense and/or basic first aid**.

## Problem:

Most students at ASU feel that there is not enough information provided to first year students about basic first aid and/or self defense.

In case of an emergency, students would like to be educated on treating minor wounds, CPR, alcohol poisoning, and fainting.

What would you like to know how to do in case of emergency? [check all that apply]

## Proposal:

Offer a short video to students during 1<sup>st</sup> year freshman courses that gives tips on self defense and basic first aid and advertises all the safety programs that ASU has to offer.
