

WHY A SELF DEFENSE KEYCHAIN?

As freshmen at ASU it is a big change moving out and living on campus and being by yourself. From our data students feel unsafe on campus due to assault reports from LiveSafe. There are a staggering number of assaults on campus and getting notifications almost every month about them is frightening

By having an ASU self defense keychain in your community of care kit, students would feel more safe when walking around campus.

Safety at Arizona State University

How Safe Students Think Dorms Are

Only around 35% of ASU students believe that the dorms are safe. That is a large part of our student body and when you are on campus the most. We are working to make ASU a safer campus for everyone.
